PRELIMINARY REPORT

TO HIS EXCELLENCY,

JOHN J. CORNWELL,

GOVERNOR OF WEST VIRGINIA.

SIR:—I herewith submit to you my fourth Annual Report of the Department of Mines, it being the thirty-fifth annual report of the condition of the coal mines in this State. The period covered by the statistics shown therein is for the fiscal year beginning July 1, 1916, and ending June 30, 1917.

During this year the conditions in the coal industry of the State have been considerably unsettled. There have been numerous transfers of holdings and quite a large number of new companies organized. The production for the year, while it shows a small increase in the production of coal and a fair increase in the manufacture of coke, yet these increases are not as large as they should have been. The present equipment of the coal companies in this State should and could have produced 125,000,000 gross tons of coal, and would have done so had it not been for the deficiency in the railway car supply. At no time during the year was the supply of railroad cars sufficient to meet the requirements of the companies, and hence greatly retarded the operation of the mines during the entire year. The companies, while employing more men, have worked fewer days and subsequently have not produced as much coal as they would have produced under normal conditions. There were 667 companies which reported 1,203 operating mines, producing 79,806,652 gross tons of coal, which is an increase over the coal produced the previous year of 191,354 gross tons. Below you will find a comparison of the production of coal and coke for the fiscal years 1916-17, together with the increase of same:

	1917	1916	Increase	Increase in Per Cent
Coal	79,806,652	79,612,298	194,354	0.24
Coke	2,333,314	1,957,632	375,682	29.41

You will note from the above that the production of coal for the year covered by this report has increased 191,354 gross tons over the year 1916, while the production of coke during the same period has increased 375,682 net tons.

INSPECTION OF SAND MINES, ETC.

The Legislature of 1917 enacted a law creating the position of Inspector of sand mines, sand pits, clay mines, clay pits, quarries and cement works, and placed the administration of this law with this Department. Mr. T. Frank Hinds, of Berkeley Springs, was appointed as such Inspector and began his duties June 15, 1917. A report of these operations is not made here, as only fifteen days of the fiscal year remained in which to collect the necessary data, thus making it impossible to do so.

RESIGNATIONS AND APPOINTMENTS.

During the year covered by this report three resignations of District Mine Inspectors were received and three appointments were necessary to fill the vacancies.

On August 1, 1916, Mr. John I. Absalom, Inspector of the 9th District, resigned and Mr. P. A. Grant was appointed to fill the vacancy.

On January 8, 1917, Mr. Samuel M. McMahon, Inspector of the 5th District, resigned and Mr. John T. McMahon was appointed in his stead.

On May 1, 1917, Mr. J. Kenna Gentry, Inspector of the 15th District, resigned, and Mr. R. Lee Jenkins was appointed.

PRODUCTION OF COAL AND COKE

During the year 667 firms representing 1,203 producing mines, together with the small country and wagon mines, reported a total production for the fiscal year ended June 30, 1917, of 79,806,652 gross tons, an increase of 194,354 gross tons, or 0.24 per cent. over the year ended June 30, 1916. Within this same period the coke manufactured in the State amounted to 2,533,314 net tons, which is an increase over the preceding year of 575,682 net tons, or 29.41 per cent. While the increase in the quantity of coal produced was not large, yet the value of the product, by reason of the increased selling price, greatly exceeded the value of the coal for the previous year. Below you will find the estimated value of the production of both coal and coke for the past year:

Total value of coal produced (79,806,652 G. T.)	\$180,363,033.52
Value of coal used in operating (1,173,949 G. T.)	2,653,124.74
Value of coal sold local trade and tenants (1,132,387 G. T.)	2,559,194.62
Value of coal used in coke ovens (3,856,904 G. T.)	8,716,603.04
Value of coal shipped from mines (72,643,412 G. T.)	164,174,111.12
Value of coal mined by small country mines (1,000,000 G. T.)	2,260,000.00
Total	\$180,363,033.52
Total value of coal sold (74,775,799 G. T.)	\$168,995,305.74
Total value of coke produced (2,533,314 N. T.)	12,083,907.78
Total value of coal placed on market	\$181,079,213.52

The increase in value of product over the previous year is as follows:

Coal	\$ 87,969,481.03
Coke	7,972,880.58
Net increase in value of product	\$ 95,942,361.61

The coal produced was disposed of in the following manner:

Produced by small country mines—sold at mines	1,000,000 G. T.
Used in operation of mines	1,173,949 G. T.
Furnished local trade and tenants from commercial mines	1,132,387 G. T.
Used in coke ovens	3,856,904 G. T.
Shipped from mines	72,643,412 G. T.
TOTAL	79,806,652 G. T.

The above tonnage compared with the previous year originated in the several Geographical Districts as follows:

	1917	1916	Decrease or Increase
Potomac	2,179,475	2,131,109	48,366 (I)
Monongahela	15,301,147	15,861,468	560,321 (D)
Wheeling	2,490,134	2,257,791	232,343 (I)
Interior	475,294	496,655	21,361 (D)

Norfolk & Western	34,876,130	34,115,492	760,638 (I)
Small Mines	1,000,000	300,000	700,000 (I)
TOTALS	79,806,652	79,612,208	194,444 (I)

During the year there were 2,955 mining machines in use at 820 mines, employing 30,539 men and producing 49,391,237 gross tons of coal, which is 61.89 per cent. of the total production of the State and which is 287,304 gross tons in excess of the machine mined coal during the fiscal year ended June 30, 1916.

The following table exhibits the growth of machine mining since the year 1897:

YEAR	Number of Mines Using Machines	Number of Machines in Use	Total Employed Incident to Machines	Number of Tons Produced by Machines	Percentage of Total Production	Number of Days Worked
1897	16	55	652	690,418	5.12	197

TOTAL.....	124,800.9 Acres

The mines of the State average 215 days during the past year as against 232 for the preceding year.

COKE OVENS AND COKE PRODUCED

There were 79 coke plants operated in the State during the year, which reported a total of 10,974 coke ovens, of which number 6,968 were in actual operation, there being 4,006 ovens not in use during the year.

There were 3,856,904 gross tons of coal converted into coke which gave a yield of 2,533,314 net tons of coke and gave employment to 2,570 persons. The increase

in the production of coke as compared with the previous year was 575,682 net tons, at an increased valuation of \$7,972,880.58. The average price per ton of coke was \$1.77, an increase of \$2.67 per ton over the preceding year.

MEN EMPLOYED

During the year there were employed at the mines and coke ovens within the State an average of 88,665 persons, an increase over the previous year of 8,607. Of the total number employed there were:

17,839	Pick Miners
25,634	Machine Miners
4,905	Machine Runners and Helpers
21,987	Inside Laborers
15,730	Outside Laborers
2,570	Coke Workers

Counting the superintendents, mine foremen, fire bosses, store managers, store and office clerks, it would be safe to add six persons per mine, employed in these capacities. Basing this estimate on 1,203 producing mines, it would make a total of 7,218 persons, or a grand total of employees directly connected with the operation of the mines of 95,883.

The nationalities of the persons employed in and around the mines are given in a tabulated form in another part of this report and the totals of the various nationalities are as follows:

American (White)	18,237
Negroes	18,128
Italians	7,388
Hungarians	4,346
Polish	2,117
Slavish	1,215
Austrian	1,833
Russian	1,362
Other Nationalities	4,039
TOTALS	88,665

SHIPMENTS OF COAL AND COKE

For the fiscal year ended June 30, 1917, the operating coal companies of the State reported 71,979,914 gross tons of coal and 2,533,314 net tons of coke as being shipped over the railroads from the mines in the State. They also reported for the same period 663,498 gross tons of coal as being shipped by river. The coal floated down the Great Kanawha river amounted to 645,211 gross tons as against 1,099,042 gross tons for the previous year. There were also floated down the Ohio river from this State 18,287 gross tons of coal. This does not include the tonnage of fuel consumed by water craft and local river trade. There was no coal shipped by the Monongahela river and no coke was shipped by water, either by the Kanawha, Monongahela or Ohio rivers during the year.

SELLING PRICE OF COAL AND WAGES PAID

During the year the average price received by pick miners throughout the State for mining run-of-mine coal was 69 cents as against 52 cents in 1916, this being an increase of 17 cents per ton. The average tonnage produced by each pick miner was 1,649 tons, a decrease of 50 tons under the fiscal year 1916. The average annual wage of pick miners (all pick miners included) was \$1,137.81,

which was an increase of \$254.33 over that of 1916. This increase shows that while the miners worked fewer days and produced less coal, yet during the year their earnings were increased 28.80 per cent.

The average selling price of coal shipped from the mines of the State was \$2.26 per gross ton run-of-mine coal, which is an increase of \$1.17 per ton over the price received last year. Coke was sold f. o. b. at the ovens during the year at an average price of \$1.77 per net ton, which is an increase over the previous year of \$2.76 per ton.

ACCIDENTS

During the year ended June 30, 1917, there were 391 lives lost in connection with the mining operations. Of this number 348 were killed inside the mines and 46 outside. This shows a decrease in the number of fatal accidents inside the mines for this year of 22 and an increase of accidents occurring outside the mines of 17, making a net reduction in the number of fatalities of 5. During my four years as Chief of the Department of Mines the fatal accidents within the State have been gradually decreased from 541 during the fiscal year 1914—which was my first year—to the present number, 394. This includes all fatalities occurring at the mines of the State whether inside or outside, and I believe is due in a large measure to the system adopted by this Department in sending each month to all the operating companies in the State a report of the fatalities for the preceding month, giving a detailed statement of the cause of each accident. The monthly report of these accidents covers all the fatal accidents occurring at the mines, whether inside or outside, the name, date and cause of accident, and any other information which may be pertinent.

There were during the year 993 non-fatal accidents at the mines of this State, 826 of which were inside the mines and 167 outside,—thus showing a decrease in non-fatal accidents of 184 under the previous year. Below is a comparison of the fatal and non-fatal accidents occurring during the fiscal years 1916-1917:

YEAR	Fatal	Non-Fatal	Fatal Inside	Fatal Outside	Non-Fatal Inside	Non-Fatal Outside
1916.....	399	1,177	370	29	1,026	151
1917.....	394	933	348	46	826	167
	5 (D)	184 (D)	22 (D)	17 (I)	200 (D)	16 (I)

Falls of roof and coal and accidents from mine cars are still the chief factors in causing a large majority of the accidents in the mines. Statistics of the accidents from these three causes show that about 80 per cent. of them are due to contributory negligence, and would not have occurred had ordinary care been taken to prevent them.

DISASTROUS EXPLOSIONS

During the year ended June 30, 1917, two explosions occurred within this State, one inside and one outside the mines. On October 19, 1916, an explosion at Jamison No. 7 mine of the Jamison Coal & Coke Company killed ten persons. On April 18, 1917, five men were killed at Linden mine of the Hutchinson Coal Company when lightning struck the powder magazine from which they were getting their daily supply of powder. Statements in detail of these explosions will be found in another part of this report.

SUMMARY OF ACCIDENTS INSIDE THE MINES, 1816-1917

Number of inside employes per each fatality inside	202	177	25 (I)

TONNAGE PER FATALITY

Since the year 1883 the average gross tons of coal produced per each fatality inside the mines have been 158,716 tons, including 1917, which is 229,329 gross tons. At the mines where fatal accidents occurred there was an average of one life lost for each 104,308 gross tons of coal produced. The 348 lives lost inside the mines during the year occurred at 262 mines employing 29,530 persons inside and produced 36,299,057 gross tons of coal; while the other mines at which not a single life was lost inside the mines produced 43,507,595 gross tons. During the fiscal year ended June 30, 1917, the causes of accidents in which lives were lost are summarized as follows:

Killed by explosions (all forms)	12
Killed by fall of roof and coal	51
Killed by mine cars	21
Killed by electrocutions	20
Killed by other causes	47
TOTALS	348

Since 1897 there have been killed inside the mines of the State as follows:

Killed by fall of roof and coal	2,853
Killed by mine cars	609
Killed by gas explosions	419
Killed by dust explosions	702
Killed by electrocutions	260
Killed by other causes	750
TOTALS	5,533

The experience of persons killed and injured for the past fifteen years, from 1901 to 1917 inclusive, is as follows:

Having an experience of one year or less	2,861
Having an experience of two to five years	4,075
Having an experience of six to ten years	2,065
Having an experience of eleven to twenty-five years	1,541
Having an experience of twenty-five to fifty years	278
Having an experience of many years	471
Having an experience of unknown years	3,199
TOTALS	14,490

The above table shows conclusively that the persons with little experience are the persons who are most frequently injured or killed.

Since the year 1883 the average lives lost inside for every 1,000 persons employed inside the mines was 6.72

Ratio per 1,000 employed inside the mines during 1908.....	12.24
Ratio per 1,000 employed inside the mines during 1909.....	6.72

In another part of this report you will find the annual reports of the fifteen District Mine Inspectors, which give in detail the conditions existing in their respective districts.

In conclusion I desire to express to you my high appreciation of the confidence reposed in me and for the kind and courteous treatment accorded me in all matters pertaining to the discharge of my official duties.

Respectfully submitted,

EARL A. HENRY,
Chief of Department of Mines.

Charleston, W. Va., December 31, 1917.
